

# Reconditioned ~ Curved Stairlift

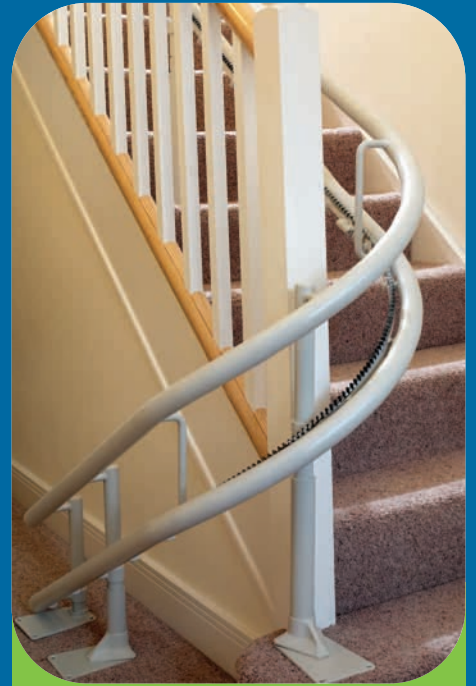

Lift your expectations...

This slimline stairlift simply folds away neatly when not in use - perfect for other stair users.

Smooth, quiet and gentle ride guaranteed.

Slimline rail can be fitted either side of the staircase.

The swivel seat is perfect for turning and getting off the stairlift onto your landing.

Simple to operate, push button or joystick controls lets the stairlift glide up and down the stairs with ease.

The wireless wall controls can be used to call the stairlift to you, or to send it to someone at the other end of the staircase.

## Fantastic on Bends.

The stylish stairlift is designed specifically for curved or more complicated staircases; it negotiates bends, landings and corridors with ease. The 101's slim carriage and rail also make it suitable for narrow staircases and when folded away leaves plenty of room for other stair users.

Operating the stairlift couldn't be simpler with push button controls or optional joystick it glides gently up or down the stairs with ease and the swivel seat makes getting on and off the stairlift easy and safe.

The stairlift's battery powered motor ensures a smooth gentle ride and with automatic charging at the top and bottom of the rail you can be sure it is always ready to use, even in the event of a power cut.

## The Stairlift Features

- Cushioned stop/start ensures smooth gentle ride
- Well upholstered seat and back rest for comfort
- Battery powered - Stairlift works even in a power cut
- Automatic slowing on bends ensures a comfortable ride
