

Halton Stairlifts

RECONDITIONED CURVED
DUAL RAIL STAIRLIFTS

HALTON STAIRLIFTS SAPPHIRE

The Reconditioned Sapphire is our entry model for curved staircases, it has all the standard safety features that you would expect on a modern curve stairlift, when not in use the stairlift can be folded flat against the wall so it takes up less space in your home and leaves the stairs clear for other users.

1. SELF-CHARGING BATTERIES

Powers the stairlift and ensures a smooth controlled ride with its gentle start and stop feature. The Halton Sapphire charges automatically when it's parked at the top or bottom of the stairs, so it is ready for use in the event of a power cut.

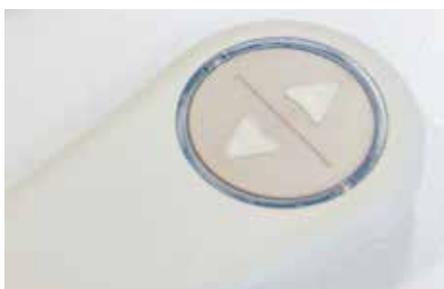

2. SWIVEL SEAT

Operated by easy-to-use levers on either side of the stairlift, allowing you to get on and off the chair with maximum ease. You can choose from either a standard swivel or optional powered swivel seat.

3. FOOTREST LEVER

This can be used to fold the footrest away to leave the stairs free for others to use. The lever saves any awkward bending down.

4. REMOTE CONTROL

Allows you to call the stairlift from the top to bottom of the staircase, it is designed for when the stairlift is used by two people.

5. DIRECTIONAL CONTROLS

The stairlift is controlled when in use, they come with either button or joystick controls.

6. KEY SWITCH

Can be used to completely isolate the stairlift. It's ideal if children are around or installed in a public area.

7. RETRACTABLE SEATBELT

Gives you added reassurance and safety, all of our stairlifts come with a safety belt as standard.

8. SAFETY EDGES

These are on the chair and carriage so that the stairlift will stop automatically if it meets any obstruction.

9. UPHOLSTERY

Available in modern vinyl's, with a section of attractive colours to choose from so that you can ensure your stairlift blends in with your décor (subject to availability).

HALTON STAIRLIFTS SIGNATURE

The Reconditioned Signature is the prestige stairlift within our curved range, with its wealth of options and safety features it's hard to find a better stairlift on the market. With its high build quality and industry leading engineering, it's designed not only to be a stairlift but to be part of the home.

1. SELF-CHARGING BATTERIES

Powers the stairlift and ensures a smooth controlled ride with its gentle start and stop feature. The Halton Signature charges automatically when it's parked at the top or bottom of the stairs, so it is ready for use in the event of a power cut.

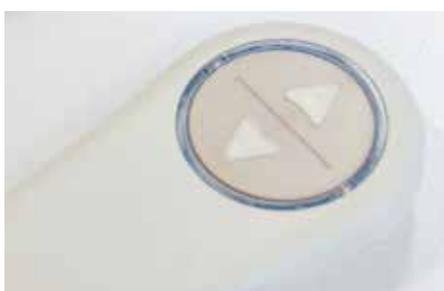

2. SWIVEL SEAT

Operated by easy-to-use levers on either side of the stairlift, allowing you to get on and off the chair with maximum ease. You can choose from either a standard swivel or optional 2 way powered swivel seat.

3. FOOTREST OPTIONS

This can be used to fold the footrest away to leave the stairs free for others to use. The lever saves any awkward bending down, there is also the option of a powered footrest.

4. REMOTE CONTROL

Allows you to call the stairlift from top to bottom, it is designed for when the stairlift is used by two people.

5. DIRECTIONAL CONTROLS

The stairlift is controlled when in use, it comes as standard with an easy to use joystick control.

6. KEY SWITCH

Can be used to completely isolate the stairlift. It's ideal if children are around or installed in a public area.

7. RETRACTABLE SEATBELT

Gives you added reassurance and safety, all of our stairlifts come with a safety belt as standard.

8. SAFETY EDGES

These are on the chair and carriage so that the stairlift will stop automatically if it meets any obstruction.

9. UPHOLSTERY

Available in modern vinyl's, with a section of attractive colours to choose from so that you can ensure your Stairlift blends in with your décor (subject to availability).

USING YOUR SAPPHIRE & SIGNATURE

The simple-to-use Halton Sapphire & Signature stairlift has been designed to make your life easier and will help you to rediscover your independence. This step-by-step guide demonstrates some of its key features.

1. Unfolding the stairlift is easy, simply unfold the seat and arms then use the footrest lever to lower the footrest without the need to bend down.

2. Once unfolded, make yourself comfortable on the seat. A seat belt is fitted for your extra safety.

3. Gentle pressure on the directional controls positioned on the arm is all it takes to make your stairlift move smoothly up or down the stairs.

4. When you reach the top of the stairs, you can swivel the chair round to face the landing so you can get off with complete safety.

5. You can swivel the seat back and fold it flat so that other users can use the staircase.

6. When not in use, the stairlift can be folded flat against the wall so it takes up less space in your home and leaves the stairs clear for other users.

A COMPANY YOU CAN TRUST

Halton Stairlifts is a family firm which specialises in the supply and installation of a wide range of new and reconditioned stairlifts. We pride ourselves on offering a personal, friendly and reliable service at highly competitive price.
